

# AeroProfessional Technical Recruitment

Access skilled technical staff to cover the full lifecycle of your aircraft, with flexible payment options available.

## Our expert engineering recruitment team can provide the support you need

With over 20 years' experience as aviation recruitment specialists, our engineering recruitment team work closely with our OEM and MRO clients to ensure that aircraft safety and operational efficiency remains paramount. We continue to support our global client base to secure them the specialist technical talent they need now and in the future, ensuring that their projects and programmes are delivered on time AND on budget.

We understand engineering and are dedicated to deliver you the people your business needs, whether for **permanent roles** or on a **contract basis**. Our network covers a broad range of engineering skills sets, including;

- ✓ Design Engineers
- ✓ Stress Engineers
- ✓ NDT
- ✓ B1/B2
- ✓ Instructors
- ✓ Maintenance
- ✓ Manufacturing
- ✓ NC programmer
- ✓ Quality
- ✓ Licensed Engineers
- ✓ Mechanics
- ✓ Avionic / Electrical
- ✓ CAMO
- ✓ Airworthiness
- ✓ Paint Technicians
- ✓ Technical Authors

*The candidates provided by AeroProfessional are experienced, very well informed of what is offered to them thanks to agency communication skills and always very motivated to work... as with my experience with other recruitment agencies I would recommend AeroProfessional the most!*

## Toolkits For Your 2021 Recovery

In addition to our recruitment services, we are proud to be **partnered with a well-established EASA Part 145**. Our goal is to deliver flexible maintenance "toolkit" solutions to help airlines prepare for a return to service. Our toolkits are designed to get you operational quickly and keep you in the sky.

### TOOLKIT 1

#### Return to Service

You may be faced with short notice to get your aircraft ready for 2021 peak season. Our toolkit will ensure you get your aircraft out of storage and returned to service before your competition. We can:

- Dispatch a team of Part 145 approved skilled engineers to your aircraft at any global location
- Complete the necessary Return to Service (RTS) maintenance under EASA Part 145
- Dispatch a flight crew to conduct the post maintenance test flight
- Ferry your aircraft back to the required station.

### TOOLKIT 2

#### Line Support / Flying Manager

With many MRO line stations closures throughout 2020, available capacity will be scarce in 2021. If you are an ACMI, Charter or Cargo operator we can support you with:

- Flexible engineers to support specific demand as it happens
- Dedicated engineers for each aircraft to cover you for the full 2021 season.

Avoid having to compete with other airlines and pay higher maintenance prices due to supply and demand.
